What is Systems/Behavioral Neuroscience?
Systems/Behavioral Neuroscience studies how neurons work together in networks to understand the mechanisms that underlie behavior. Systems/Behavioral neuroscientists tend to study how the nervous system is related to psychiatric and neurological disorders, how groups of neurons form systems that are related to specified functions (e.g., motor control, learning & memory), and what happens when such systems dysfunction.

DECLARATION REQUIREMENTS
In order to declare the pre-major, students must meet with a Neuroscience Advisor to discuss the requirements. To set up an appointment:

1. Stop by room 10 Townshend Hall
2. Give us a call at (614)-292-8512
3. E-mail us at NeuroAdvising@osu.edu
4. Attend an Info Session NeuroscienceMajor.osu.edu/declare
